Toughened glass

Easy Glass Splashbacks Glass panels are all manufactured from 6mm low iron, extra clear toughened glass, which is extremely impact resistant. It can be drilled or cut during the manufacturing process to accommodate shapes and fittings. Please don't fall into the trap of opting for cheaper, un-toughened splashbacks, only to have them crack with heat or the pressure of sockets.

Guarantee

All our coloured and printed Glass Splashbacks and Glass Shower Walls are subject to our ten year guarantee against fade or peel.

Types of images

Images are usually one of two types: raster or vector.

Raster Images

Raster Images (typically photographs) are made up of an array of pixels (points), where the colour of each point is specified. Raster images are limited in the size that they can be printed, by the number pixels (points) in the array, and the quality of the image.

Vector Images

Vector images (typically company logos or computer generated artwork) are defined as a collection of mathematical shapes, such as circles, lines, polygons, and curves, with attributes such as colour, gradient and transparency.

Vector images can be enlarged to any size, without any loss of quality. Artists create vector images using software such as Adobe Illustrator.

Many vector images are repeating images that can be tiled together, both vertically
